

# HurixDigital Converts Higher-ed Test Bank to Multiple Course Management System Formats

## OVERVIEW

The client is one of the leading educational publishers that provides customized educational content and services for pre-K through postgraduate education. They have a test bank for higher education students consisting of questions from different subjects. They wanted Hurix to convert this test bank into a format that is compatible with different course management systems.

## BUSINESS REQUIREMENTS

Convert the author-provided manuscript test bank files to Blackboard, WebCT, WebCT Vista, Print Test Bank files, and EZ Test files.

The test bank included 22 titles containing around 700 questions with tables/images/math equations which had to be converted in 4 months.

## HURIX SOLUTION

- Our dedicated team of experts prepared a checklist and guidelines for every task involved
- We used a semi-automated process for the clean-up of the input files. This process was necessary in order to make the files ready to be added to our conversion software - Respondus and EZtest
- Using the conversion software, the test bank files were converted to different CMS/LMS formats
- We added Alt-Text for around 1000 tables/images
- Around 900 math equation images were converted to MathML format. MathML is used to describe mathematical and scientific notations

## KEY BENEFITS DELIVERED

## ABOUT HURIX

HurixDigital is a pioneer in delivering digital content and technology solutions for publishers, educational institutions, enterprises and associations globally. We enable multinational corporations in their digital transformation journey with our cloud-based platforms, leading-edge products and solutions. We also deliver content creation and transformation solutions that help clients stay ahead of the curve. At HurixDigital, we foster thought leadership and innovation that help us add value to our clients' business.
